

## DSS Online Workshop Series

Strengthen your safety culture with interactive workshops delivered virtually

The pandemic may have curtailed in person classroom training but not learning.

**DuPont Sustainable Solutions (DSS)** a leading global operations management consulting services and learning solutions company is offering a series of short interactive online workshops to **Indian Chemical Council (ICC)** members to further their learning around Safety, Operations Risk Management and Leadership. You may choose to attend one or more of these workshops planned in the coming months. All participants will receive a certificate of participation.

**Cost per workshop:** Rs. 6500/- plus GST

**Duration:** 4 hours (9 am - 1 pm) IST

**Instructors:** DSS expert consultants

### LIST OF ONLINE WORKSHOPS

#### WORKSHOP 1

**Risk factor - Beyond Behaviour Based Safety (BBBS)**  
**October 16th, Friday**

**REGISTER**

Risk factor - Beyond Behaviour Based Safety (BBBS) workshop is a risk awareness program that helps leaders understand the emotional, subconscious reasons behind employees risky decisions and unsafe behaviors. It shows how to sharpen safety awareness, commitment, and promote safer decisions and behaviors in the workplace. This workshop differentiates between decisions versus actions and on influencing the decision making process versus managing behavior.

This 4-hour Executive Leadership Workshop is exclusively designed to help leaders get exposed to DSS time tested and proven approach around:

- Latest thinking in the field of Organization's Safety/Risk Management
- What is Beyond BBS?
- DuPont Integrated Risk Based Approach
- Methods for better decisions and safer actions at the workplace

## WORKSHOP 2

### Human Factors – Error Reduction October 30th, Friday

[REGISTER](#)

The four-hour session on Human Error Reduction for Manufacturing and Services organizations examines what influences people to make errors by omission or by commission. The impact of such errors can be costly reworks, low quality output, delays or even catastrophic incidents that harm life. This workshop seeks to explore the potential to identify and eliminate error making tendencies resulting from the way we are setup.

Participants will:

- Experience a fresh approach to revisiting job processes and weed out error enablers
- Review best practices in applying Human Error Reduction Program at their workplace

## WORKSHOP 3

### Frontline Leadership Skills Series – Safety November 20th, Friday

[REGISTER](#)

Frontline Supervisors are the lynch pin to execution and driving change. To ensure strong, safe, and consistent performance, organizations must invest in and effectively leverage their frontline supervisors. Supervisors must be equipped with the right competencies and skills to provide coaching and ensure accountability. One of the competencies required of supervisors is to ensure safe operations. DuPont Sustainable Solutions is offering this module on Safety relevant to frontline supervisors that can help them describe the importance of safety standards and know the core tools and approaches that drives safety performance.

This four-hour workshop on safety leadership will touch upon topics such as

- Setting the safety standard
- Visible leadership in safety
- Conducting Safety Observations

## WORKSHOP 4

## Process Safety - Key to Operations Risk Management December 11th, Friday

**REGISTER**

Process Safety Management (PSM) is management systems and controls (programs, procedures, audits, evaluations) applied to a manufacturing process in a way that process hazards are identified, understood, and controlled so that process related injuries and incidents are prevented. Deals with the prevention and control of events that have the potential to release hazardous materials and energy. When implemented within the framework of ORM it appropriately balances risk with business performance while always protecting life and preventing incidents and losses and optimizing opportunities for future and sustained growth.

The four-hour workshop will cover

- Overview of Process Safety Management
- Relevance of PSM to Process Industry
- PSM Elements
- Risk-Based approach to manage Process Safety Risks
